

Introduction

The German Society for Corrosion Protection (GfKORR e.V.) has set itself the aim of minimising the occurrence of corrosion damage in Germany through education. For this purpose, Korrosionum events are held annually and this one focusses on minimising corrosion and corrosion damage to electronic assemblies. Drawing on a broad, interdisciplinary knowledge the subject presented have been collected specifically for electronic assembly manufacturers.

The lecture programme will provide information on the application limits of the individual materials used in electronics and on the expected impacts of the environment. Corrosion failures in electronics are not exclusively limited to clearly detectable materials deteriorations but are primarily caused by electrical malfunctions based on the electronic conductivity of the corrosion products.

The aim of this Korrosionum is to inform attendees about corrosion problems that may be encountered and to provide guidance on how to solve them.

Target groups

Electronic manufacturers: quality assurance, process technology, environmental testing laboratory, analytics, production technology

Electronic users: automotive electronics, industrial electronics, renewable energies, aerospace and railway technology

About GfKORR

The GfKORR – Gesellschaft für Korrosionsschutz e.V. (German Society for Corrosion Protection) is an interdisciplinary association of experts from industry and R&D, aiming at reducing corrosion and consequential damages in all areas of life and technology. The GfKORR dedicates itself to comprehensive route cause analysis and supports efficient knowledge transfer in all areas of corrosion to improve integrity of assets, safer livings and environmental protection.

Materials damages due to corrosion cost billions of Euros annually in Germany alone, affecting almost all branches of industry and economic sectors. Including secondary costs caused by loss of production or product performance, the overall economic damage amounts to more than 4% of the gross national product.

In order to enable effective corrosion prevention the GfKORR is dedicated to promoting sound basic research and efficient knowledge transfer in all fields of corrosion and materials protection. Remember: There is no technology without materials and there is no materials application without integrity evaluation.

GfKORR – Gesellschaft für Korrosionsschutz e.V.

Korrosionum Basics for Electronics

26 October 2023

Online Event

in cooperation with

**ZESTRON
ACADEMY**

Programme – 26 October 2023

08:45 Welcome, introduction of participants and their specific focus

Dr.-Ing. Helmut Schweigart

Dr. O.K. Wack Chemie GmbH, Ingolstadt

09:15 Introduction to the topic

Dr.-Ing. Helmut Schweigart

Dr. O.K. Wack Chemie GmbH, Ingolstadt

09:30 Copper alloys

Corrosion mechanisms, protection/
coatability

Prof. Dr.-Ing. Ralf Feser

FH Südwestfalen - Hochschule für Technik
und Wirtschaft, Iserlohn

10:30 Break

11:00 Tin materials

Mechanism, protection options

Dr.-Ing. Michael Schneider

Fraunhofer IKTS, Dresden

11:40 Break

12:45 Aluminium materials

Corrosion types and mechanisms,
corrosion resistance and protection/
corrosion resistant design and coatability

Dr.-Ing. Dietrich Wieser

Bonn

14:00 Break

Programme – 26 October 2023

14:30 Nickel materials

Electrochemical characteristics of nickel
and nickel coatings (galvanic, electroless),
resistance in aqueous and organic media,
performance in clean and contaminated
gas atmospheres, feature of failures

Prof. Dr. habil. Günter Schmitt

IFINKOR Institut für Instandhaltung und
Korrosionsschutztechnik gGmbH, Iserlohn

15:15 Zinc materials

Corrosion mechanisms, durability under
corrosive gas and in humid environments,
protection options

Dr. Frank Prenger

Grillo-Werke AG, Duisburg

16:00 Break

16:15 Silver metallization

Electrochemical characterization,
resistance in aqueous environments,
protection options and damage images

Dr.-Ing. Stefan Wagner

Fraunhofer Institut für Zuverlässigkeit und
Mikrointegration, Berlin

16:45 Summary of the day

Dr.-Ing. Helmut Schweigart

Dr. O.K. Wack Chemie GmbH, Ingolstadt

17:00 End of seminar

Unforeseen programme changes are reserved.

Host: GfKORR e.V.

In cooperation with the Zestron Academy

Organisation

Registration

For organisational reasons, please send your
registration by **19 October 2023** to:

GfKORR - Gesellschaft für Korrosionsschutz e.V.

Theodor-Heuss-Allee 25

60486 Frankfurt / Main

Phone: +49 (0)69 7564-360/-436

E-mail: gfkorr@dechema.de

Web: <https://gfkorr.de/Veranstaltungen>

Participation fees *)

Members of GfKORR 670,- €

Non-Members 690,- €

Pensioners 200,- €

Students (under 30 years) 50,- €

*) no VAT requested according to § 4.22 UStG

The registration fees include the presentation
slides.

Conditions of participation

Following receipt of the registration, a
confirmation, and the invoice on the amount due
will be sent to the course participant.

Registered participants can cancel in writing free
of charge no later than **19 October 2023**. After this
date 80% of the participation fee will be charged.
In case of absence or cancellation of participation,
the full participation fee is to be paid. A
replacement of a participant is possible at all
times.

Please send registration to:
E-Mail: gfkorr@dechema.de
